HLX FUND RANGE

HLX Japan Equity Fund (USDC) A-acc

HLX-JPN · Key Information Document · 2 November 2026

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by the PRIIPs framework to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products. It is a simulated document: no PRIIPs manufacturer exists for this strategy and no regulator has reviewed it.

Product

Product name	HLX Japan Equity Fund (USDC) A-acc
Product code	HLX-JPN
PRIIPs manufacturer	HLX (publisher of the simulated range)
Competent authority	none — the product is not authorised or supervised
Date of this document	2 November 2026
Currency	USDC

What is this product?

Type	Term	Objectives
Long-only basket of perpetual futures and cash collateral, traded on Hyperliquid	Open-ended, no maturity	Track HLX Japan composite by holding the fixed weights in the portfolio table, rules-based and rebalanced quarterly

Intended retail investor. Investors who understand perpetual futures, funding payments and on-chain settlement, who can bear losses up to the full amount invested, and who are targeting a risk level of 5 out of 7. The product is not suitable for investors who need capital protection or a regular income.

What are the risks and what could I get in return?

Risk indicator: 5 out of 7 · 1 2 3 4 [5] 6 7

1 = lower risk, 7 = higher risk. The indicator assumes you keep the product for at least one year. The product has no capital protection; you could lose the entire amount invested.

Volatility noted in the simulation: 40.3% annualised, with a maximum drawdown of -21.0% since 2026-06-26.

Performance scenarios (per 10,000 USDC invested, one-year holding period). The scenarios are derived from the simulated return and volatility, not from a PRIIPs mandated methodology, and are not a forecast.

Scenario	What you might get back after 1 year	Average return each year
Stress	-2,700 USDC	-
Unfavourable	1,330 USDC	-86.7%
Moderate	5,360 USDC	-46.4%
Favourable	9,390 USDC	-6.1%

What happens if HLX is unable to pay out?

There is no pay-out obligation and no compensation scheme. The product is not a deposit and is not covered by any depositor guarantee or investor protection fund. You hold the underlying positions in your own on-chain account; if a venue, oracle or bridge fails, you bear the loss directly.

What are the costs?

Illustrative costs for a one-year holding period, per 10,000 USDC invested.

Cost type	**Amount**	**Per year**	**What it covers**
Entry costs	0.00 USDC	0.00%	No entry charge
Exit costs	0.00 USDC	0.00%	No exit charge
Management fees	60.00 USDC	0.60%	Illustrative management fee
Transaction costs	10.00 USDC	0.10%	Venue taker fees and slippage on rebalancing
Performance fees	0.00 USDC	0.00%	None
Funding on short legs	variable	variable	Only where a hedge leg exists (HLX-FUND)

Total illustrative ongoing cost per year: 0.70% of the amount invested.

How long should I hold it and can I take money out early?

Recommended holding period: one year or longer. There is no minimum holding period and no lock-up. You can exit at any time by unwinding the weight vector on the venue; settlement is atomic and continuous, including at weekends. Exiting in a thin market may require limit orders and widen the effective spread.

How can I complain?

There is no manufacturer, distributor or ombudsman to complain to. This document describes a simulated strategy; no contractual relationship exists.

Other relevant information

The full description of the strategy, its risks and its valuation is in the simplified prospectus for HLX-JPN, and the current target weights and simulated performance are in the factsheet. All figures are simulated, gross of the costs shown above, and are not the return of any actual portfolio.

This document is a simulated fund factsheet produced for research and demonstration purposes. The HLX funds are not registered collective investment schemes, are not offered or sold to the public, and have no custodian, transfer agent or prospectus filed with any regulator. Performance shown is a backtest of the stated target weights applied to historical Hyperliquid market prices and does not represent the return of any actual portfolio; past performance does not predict future results. Data as of 2 November 2026.
